

Hybrid Watermelon Triploid / Seedless **SINRUBITA F1**

Very early seedless hybrid.
Light green skin with narrow dark stripes (Tiger type).
Almost round shape, very uniform.
Very high and concentrated set production.
Strong vine mid-lrg leaves.
4-6 kg average (5-7 when grafted).
Bright red crispy flesh.
Sweet very high brix 11.5.
Uniform thick rind, very good.
Packer and traveller.
Ok for protected crops and open field. Well performing also.
Under warm climate.
